

# PDF creation tool for Windows PC

## CutePDF Writer

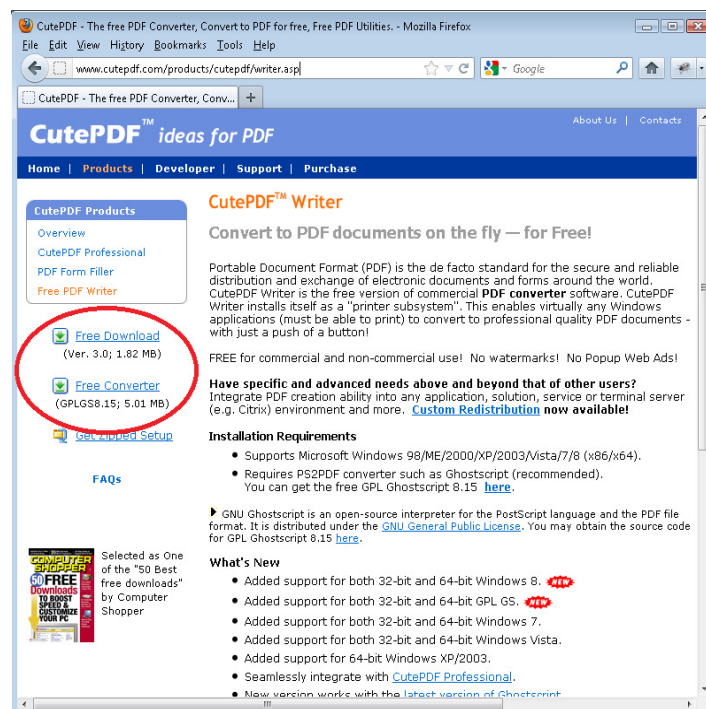

- ⤴ FREE
- ⤴ Safe (no spyware)
- ⤴ Easy to use (installs as a printer)
- ⤴ Creates a portable, read-only document viewable on almost all computers
- ⤴ Compatible with all versions of Windows (except Win95 & NT)

To download, type the following URL into the address bar of your web browser:

<http://www.cutepdf.com/products/cutepdf/writer.asp>

Click to following two (2) links highlighted in the red circle below and save them to the desktop:

- ⤴ “Free Download”
- ⤴ “Free Converter”

To install the CutePDF software, install the following programs in sequential order:

- ⤴ “converter.exe” (GhostScript)
- ⤴ “CuteWriter.exe” (CutePDF)

To install “converter.exe”, execute the following steps:

- ⤴ click “converter.exe” file icon
- ⤴ accept (click “run” and “ok”) to the Windows security warning if applicable
- ⤴ click “Setup”

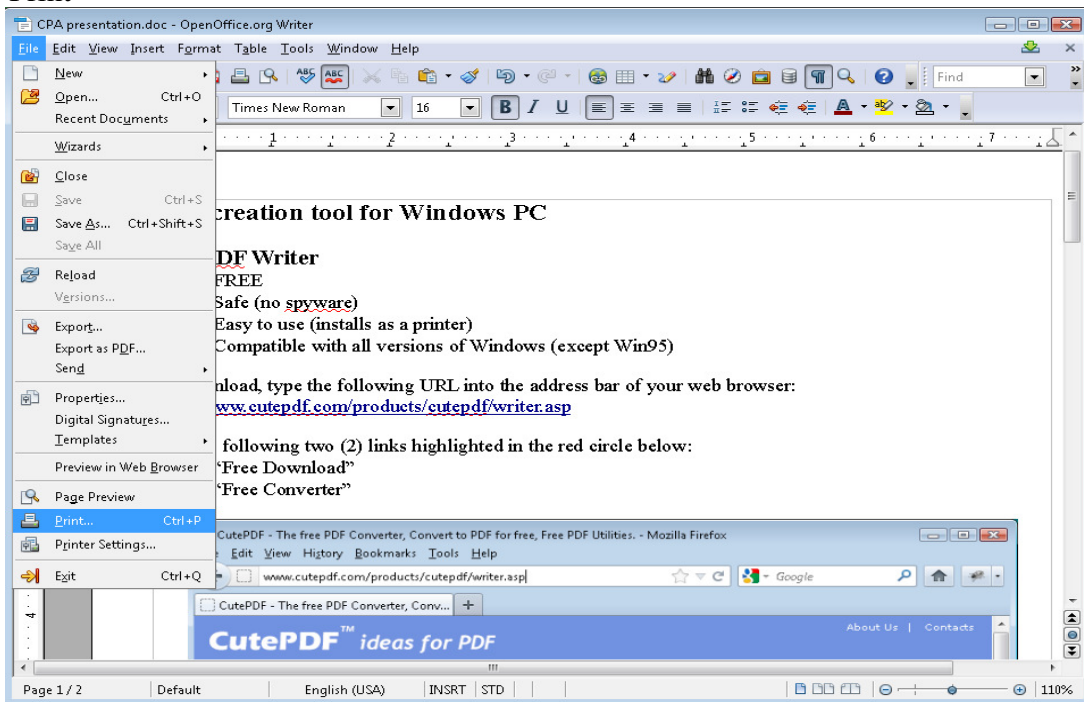

To install “CuteWriter.exe”, execute the following steps:

- ⤴ at the “Welcome to Setup” screen, click “Next”
- ⤴ click “accept” to the license agreement
- ⤴ uncheck the three (3) checkboxes related to the optional toolbar, click “next”
- ⤴ click “install”
- ⤴ click “yes” if asked to install the PS2PDF (GhostScript) program

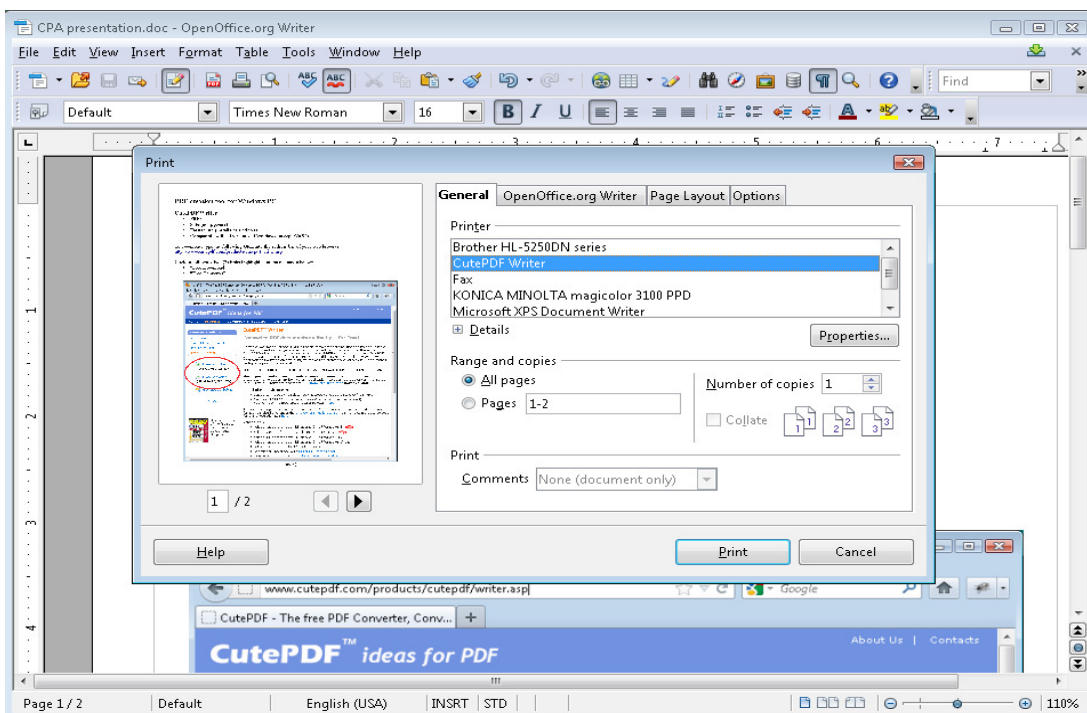

**DO NOT look for any application to run. Just print your document using CutePDF Writer (the printer) in any Windows program to get PDF output.**

To create an PDF document, perform the following:

- ✦ click “File” from the menu bar
- ✦ click “Print”

- ✦ select “CutePDF Writer” from the printer list

- ✦ select the folder where you want to save your document
- ✦ click “save”
